

1984 **STARCRAFT**

CAMPING TRAILERS
OUR 81ST YEAR OF QUALITY PRODUCTS

#1 in world-wide sales for 18 years.

You Get More Advantages With Starcraft Than Any Competitive Brand.

The advantage of owning the world's leading camping trailer for 18 years! Number 1 in sales!

The advantage of owning a camping trailer built by the most experienced producer. We've built more than double the number of anyone else!

The advantage of aerospace construction techniques and experience. We're the only camping trailer company building F.A.A. certified aircraft cabinetry! The knowledge and experience we've gained helps us build lighter, stronger camping trailers.

The advantage of dealing with a company that's been satisfying consumers with quality products for 81 years ... continuous quality and integrity since 1903.

The advantage of knowing the trailer that you buy today can be towed by the car you may buy in the years to come. We have five models under 1000 pounds and even our largest, most deluxe unit with all factory options weighs under 2000 lbs! Many properly equipped compacts can tow them.

The advantage of Starcraft's exclusive 5-year limited warranty on our internal lifter systems. Three years coverage for parts and labor plus two additional years for parts. The industry's best lifter system.

The advantage of Starcraft's four manufacturing/service facilities in North America. We're closer to you with parts and service!

The advantage of Starcraft's coast-to-coast dealer networks in the U.S. and Canada. More dealers than any other camping trailer company!

The advantage of owning the most luxurious, technically advanced camping trailers made today!

The advantage of honest weights, independently certified by the well-respected United States Auto Club for the last three years!

The advantage of getting your first year of membership free in the Starcraft Camper Club. National and regional rallies are just some of the fun-filled activities enjoyed regularly by its 3,000 members. You're never alone when you own a Starcraft!

The advantage of owning a camping trailer whose major components are all built from scratch by Starcraft, not just assembled. Critical tolerance components such as frames, tents, cabinets and cushions.

The advantage of owning a camping trailer constructed with top quality purchased components such as Goodyear tires, Dometic refrigerators, Duraflex suspensions, Timkin bearings, and Terrasol 302 canvas to name just a few.

The advantage of quality manufacturing from people who care. Our main production facility is located in Topeka, Indiana ... right in the heart of northern Indiana's Amish country. The Amish are people known for their craftsmanship. All of our plants are in rural areas, staffed by people who care about the work they do. We are just as proud of all our employees as they are about the caliber of work they produce.

The advantage of buying from a sound, stable company. Since 1967, Starcraft has been part of the Bangor Punta family of leisure-time product companies. This puts us in the same company as Piper Aircraft, Smith and Wesson firearms, Starcraft Marine, O'Day sailboats, and Cal sailing yachts. You can count on us to be around if you ever need parts or service for your Starcraft.

Smith & Wesson

STARCRAFT MARINE

CAL O'Day

The advantages of fuel economy and vacation savings! Last year, the United States Auto Club subjected a Starcraft 17' AeroStar to a grueling 1,479 mile, real world test course. Through the mountain grades and blazing desert heat of California, Arizona, Nevada and Utah with a real family of four and all their luggage. The result? Exactly 1.03 extra gallons of gas for every 100 miles driven compared to the same sub-compact Pontiac J-2000 (definitely a car of tomorrow) driven by the same family over the identical course. What's even better, the saved \$77.00 per day with the camping trailer compared with motel and restaurant bills on the trip with the car alone. These figures are real. USAC certified them and your dealer can supply you with complete details upon request. In 1980 a similar 2,487 mile cross country test with a 1980 Starflyer and a compact Pontiac Ventura produced the identical results of 1.03 gallons of gas per 100 miles driven. So, with the right tow vehicle, any Starcraft can be towed for just about one gallon per 100 miles driven. Only Starcraft has the confidence in its products to conduct these independent tests.

About one extra gallon per hundred miles driven!

Quality. Thorough Engineering. Advanced Technology ...

Three-time Indy 500 Winner Johnny Rutherford Explains Camping Trailer Aerodynamics:

"The low profile of a camping trailer lets it 'tuck in' behind the tow car. The car breaks the air and it then basically flows over the camping trailer which creates little extra drag. A couple inches of difference in trailer height doesn't make a whole lot of difference in drag as long as the top of the trailer is not higher than the top of the car, like it would be with a travel trailer. So don't cheat yourself out of valuable inside livability and storage just to get an extra-low profile."

Johnny Rutherford

The aerodynamics of the car are really more important than the aerodynamics of the camper. It is the car that interrupts the static air mass. The air then basically flows over the car and camper.

From the ground up, the new Starcrafts are stronger and lighter.

Starcraft's strong, aircraft style open "C" channel frames allow water to drain out-not to build up and rust inside like tubular style frames. We've also taken advantage of every opportunity to eliminate weight from our frame. Note the aircraft-style circular cutouts in non-critical areas to take out weight without any sacrifice in strength. These reductions have allowed us to keep hitch weights light while maintaining the optimum ratio between hitch weight and total weight for easy towing. Even our biggest model has a hitch weight of only 140 pounds.

All Tents Are Not Created Equal!

The advantage of quality materials ...

All Starcraft tents are made in five separate sections. Damage to any one panel does not mean replacing the whole tent. Each separating zipper can serve as an emergency exit and the tent assembly is stronger and better appearing. We use extensive lock stitching, primarily 5 stitches per inch and seams in all stress areas are double stitched and lap-seamed.

The material a tent is made of is equally important. We start with Terrasol 302, a U.S. Army proven, 11 to 1, 100% Cotton Duck canvas which is mineral dyed for ultimate resistance to fading. It's water repellent and rot resistant, and it meets FMVSS 302 fire retardancy specifications. Bunk ends are covered with seamless 100% Virgin UV resistant, embossed vinyl over a 100% Polyester Duck substrate. Durable self-lubricating nylon zippers, fine mesh fiberglass screening, tinted clear vinyl windows and Velcro fasteners complete our list of high quality tent materials.

The Advantage Of A Superior Ride

Every AllStar and AeroStar model is equipped with a Henschen Duraflex suspension. This is a fully independent, torsion bar design and is a Starcraft exclusive for camping trailers. However, you will find it on super-premium priced travel trailers. Here's what Johnny Rutherford has to say about Duraflex. "Independent suspension all but eliminates oversteer and understeer and resulting sway. That's because each wheel reacts independently to bumps. The suspension is tuned to the weight of each unit to yield a superb ride with little or no bounce. Eliminating sway and bounce is very important with today's smaller, lighter tow vehicles". What's more, the system has no springs to break and is maintenance free. StarLite models also utilize a fully independent torsion bar suspension.

AllStar. Our best, most luxurious Starcrafts.

These are the ultimate in camping trailers ... simply the very best. We're so proud of our AllStars, we've given each of them their own name—LoneStar, Constellation, Galaxy, StarDust, Starmaster, and Starflyer. Superb quality, no-compromise features, unmatched luxury, loads and loads of storage, and the easiest set up of any camping trailer make AllStar the Cadillac of camping trailers. They're actually roomier and better equipped than many travel trailers.

Here's why AllStar is the best camper made today!

Lifter covers protect lifter mechanism from rain on the outside, improve looks on the inside.

The top of our redesigned door is self-storing and swings down easily into position. It features two removable sliding privacy panels.

Clean, anodized aluminum bunk support poles let you set up bunk ends with little effort.

AllStar's lightweight, 3-burner stove can be used indoors or outside and works off the main L.P. gas system.

Our city waterfill is made from brass, not the breakable plastic coupling found on some other brands.

Starcraft tents are sectionalized and equipped with heavy-duty zippers.

Aerospace lamination techniques have helped us produce insulated bunk ends not only lightweight but amazingly strong.

There's ample sit-up headroom in the bunk ends.

Our new dolly jack is a one-piece assembly that can be adjusted up or down. Since the wheel never comes off, it can never get lost. And the wheel is made from rubber so it rolls easier than ever before.

The AllStar floor is a 5-part laminate consisting of vinyl flooring, wood foam insulation, another layer of plywood and a heavy-gauge sheet metal on the bottom to keep out moisture and road dirt. When you think about the wear and stress a camper floor has to endure, you'll know why we've made the AllStar floor this good!

Our new rear mounted lift system cranks up with fewer turns and less effort than any other competitive model. The system also features an automatic brake that stops the roof when you stop cranking.

Sturdy galvanized wheel wells are standard equipment. Our 5-bolt wheels and large 12" or 13" tires are easily accessible with our open perimeter frame design.

Our AllStar models have Duraflex® independent torsion bar suspension for a superior ride.

All of our AllStars have a complete metal under-floor for maximum protection against road damage and moisture.

Laminated layers of aluminum, foam insulation, and paneling make our roofs strong, yet lightweight. Even the roof sidewalls are laminated and have aluminum on the inside for greater strength and improved appearance.

All AllStar models have four bolted on stabilizer jacks as standard equipment.

Our new tail lights have back-up lights for increased safety and better visibility.

Try the "thump test" when you're comparison shopping. A quick thump on the sidewall will tell you if a camper sidewall is well-built, or if it is essentially hollow between the inner and outer layers. Our strength lies in our 4-part lamination which includes a thick layer of insulation.

See our complete list of standard features inside back cover.

LoneStar. Full-Size Room And Elegance.

24 LoneStar

Who else but Starcraft could build this much elegance into a fold-down? Our LoneStar standard equipment list reads like it's describing an expensive full size travel trailer. Some of these features include a 20-gallon fresh water tank, quick recovery water heater, a well-organized galley area with a spacious stainless steel sink, lots of open counter top area, and our unique carry-out range. LoneStar's floor plan also has two dining/social areas which convert easily into comfortable, roomy beds. If your family needs lots of room and lots of elegance, our LoneStar will fit just fine — it sleeps eight.

24 Constellation. A New Standard Of Excellence.

24 Constellation.

Our 24 Constellation sets a new standard of design excellence for the others to follow. Standard equipment includes a 6 gallon quick-recovery hot water heater, heavy duty 12V-DC water pump, home size stainless steel sink, stand-up wardrobe, a huge chest of drawers, a swing-up chemical toilet compartment and "acres" of counter top space and storage. Our Constellation also has options available that will make your trailer the envy of the campground. These include carpeting, a plush velour fabric package, and even a microwave oven!

Total Dry Weight 1706

Twenty-Four Feet From Bunkend to Bunkend With

24 Stardust

Our Stardust is designed for large families. It emphasizes built-in features, luxury, and lots of interior room. There's also an abundance of storage areas highlighted by a full-length stand-up wardrobe and our convenient 3-drawer organizer system. Stardust also has our super-sized 70"x72" bunk and a side sofa dinette that converts to an extra long 76" bed with comfortable 4" thick cushions.

It's a truly liveable interior with two separate dining and social areas by day. By night it provides comfortable sleeping room for as many as eight.

Axle Weight 1474 • Hitch Weight 144
Total Dry Weight 1618

Our optional shower package is available on the Stardust and Galaxy models. It includes a dressing room privacy curtain, molded tub base, complete wrap around shower curtain with fiberglass cap, mixing faucet, hand-held shower-head, 6-gallon quick recovery water heater, and 20-gallon fresh water tank.

A Lot Of Luxury In-Between.

24 Galaxy

Like our Stardust, the Galaxy is designed with lots of built-in luxury, storage and convenience features. It's a six-sleeper floor plan designed to give you lots of elbow room. You'll find wicker door and drawer fronts that add a real touch of class, and our convenient carry-out range. Our Galaxy also has plenty of open counter top space including a spacious work surface area located directly across from the galley area.

Our Galaxy measures twenty-four feet from end to end, and there's a lot of luxury in between.

Axle Weight 1460 ● Hitch Weight 144
Total Dry Weight 1604

Starmaster. The American Classic.

21 Starmaster

The Starmaster has been a stalwart in the Starcraft line for many years. In fact, we've sold more Starmasters than some companies have sold total camping trailers.

For 1984, our 21 Starmaster features all the changes and improvements found throughout the AllStar line, and the additional convenience of built-in porta-potti storage. But we haven't changed the things that have made Starmaster a classic. Like luxury, quality, convenience, and features.

Axle Weight 1234 • Hitch Weight 130
Total Dry Weight 1364

Starflyer. Full Size Features In A Compact!

19 Starflyer

When it comes to built-in features, Starflyer's got lots of them. Maybe that's why it's one of the most popular camping trailers in the Starcraft line. Starflyer has plenty of storage inside and a large storage trunk outside. It's been designed with an efficient U-shaped kitchen that includes wicker door and drawer fronts, attractive butcher block counter tops, and our convenient indoor/outdoor range. Compare Starflyer's feature to those found on full-size camping trailers ... then compare weights. For a camping trailer that weighs only 1136 pounds, Starflyer's a pretty good little package.

Axle Weight 1178 • Hitch Weight 92
Total Dry Weight 1270

AeroStar. Our most technologically - advanced Starcrafts.

The AeroStar series represents the "state of the art" in lightweight camping trailer technology. Drawing upon our aircraft cabinet building experience, we've employed sophisticated aerospace lamination techniques and materials to engineer out weight while retaining an impressive list of standard features. Never has so much quality been offered with such little weight—independently certified weights of under 1000 lbs. for the 19' AeroStar and under 900 lbs. for the 17' AeroStar.

Aerospace Technology. Human Engineering.

The top of our redesigned door is self-storing and swings down easily into position. It features two removable sliding privacy panels.

Starcraft's "easy-up" bunk system lets you complete set up without crawling on the bunk.

Both AeroStars have a new lightweight indoor/outdoor range.

Sewn-in lifter covers attach with Velcro. They keep out rain and improve cosmetic appearance.

Sectionalized canvas unzips to lessen the stress on sidewalls when cranking.

Laminated layers of aluminum, foam insulation, and paneling make our roofs strong, yet lightweight. Even the roof sidewalls are laminated and have aluminum on the inside for greater strength and improved appearance.

Our radiused bunk ends give you plenty of headroom and aid rain run-off.

Our tail lights have back-up lights. And AeroStar has stabilizing jacks bolted onto the bumper to put them in easy reach.

The lightweight free standing table can be used indoors or outside.

AeroStar's lightweight bunk end is produced using sophisticated lamination techniques.

Our rear mounted lift system cranks up easily and features a friction brake that stops the roof when you stop cranking.

The AeroStar galley swings down without flipping over. No need to remove contents when breaking camp.

Sturdy galvanized wheel wells are standard equipment. Our 5-bolt wheels and large 12" tires are easily accessible with our open perimeter frame design.

AeroStar's feature Duraflex independent torsion bar suspension for a smooth ride.

The sidewall is fully insulated and remarkably strong because of lamination production techniques.

The AeroStar floor is a sturdy 4-part lamination with a complete metal underfloor.

Our one-piece dolly jack adjusts easily into position. The rubber wheel rolls smoothly and never comes off.

See our complete list of standard features inside back cover.

Full-Size Luxury Was Never This Light.

19 AeroStar

Our 19 AeroStar is fully-featured, yet has a low, sleek 44½" towing profile. For a camper that weighs less than 1,000 lbs., the 19 AeroStar has one of the roomiest, most liveable interiors of any camping trailer made today. Standard features include a lightweight indoor/outdoor range, spacious, real wood cabinetry with deluxe hardware, stain-resistant cushion fabrics, and decorator drapes with tie-backs and matching fabric valances.

With all its liveable luxury, you'd never know the 19 AeroStar was one of the most technologically advanced camping trailers on the market today.

Axle Weight 922 • Hitch Weight 76
Total Dry Weight 998

The Trailer Of Tomorrow Is Here Today.

17 AeroStar

The camper that other companies will be building tomorrow is available from Starcraft today. It's stronger and lighter on the outside, which let's us give you more luxury on the inside. Our 17 AeroStar features our newly designed carry-out range. A stainless steel sink with a 2-stage faucet and a 10-gallon water tank. An electrical system complete with outside patio light and 6-amp power converter. A lightweight, free-standing table that can be used indoors or outside. It's a camping trailer that's big enough for a family of five, yet small enough to be towed by today's and tomorrow's small cars.

Axle Weight 848 • Hitch Weight 74 • Total Dry Weight 922

StarLite. Our most economical Starcrafts.

Starcraft's lightweight StarLite models offer more features and quality than any other budget priced camping trailer. Standard features like our dependable rear-mounted lift system, open wheel perimeter frame with galvanized wheel wells, torsion bar suspension, laminated roofs and walls, one-piece floors and fully-sectionalized tents with tinted vinyl windows. In fact, StarLite models compare favorably with many premium priced brands! Outstanding features and Starcraft quality at a suprisingly low price!

More standards than many premium priced brands.

Standard now on all models are lifter flaps. Both esthetic and functional, the flaps make for a more pleasing interior as well as keep the rain out of the lifters.

All StarLites have sectionalized canvas which can be detached before raising or lowering to lessen stress on the main front and rear panels.

An amber patio light is standard on all StarLite models.

All StarLites are equipped with roof vents to increase ventilation in the galley area.

All Starcrafts have the same lightweight 3-part laminated roof that is perhaps the strongest roof built on any camping trailer today. In addition to the outside aluminum, the roof sidewall also has aluminum inside for greater strength and improved appearance. Ventures also have insulated sidewalls and a lightweight, one-piece Blandex floor.

A 25' power cord lets you quickly hook in to campsite electricity.

A 3-burner chrome range, and stainless steel sinks are standard on all StarLite models.

The standard rear bumper helps protect your StarLite from unseen obstacles when you're backing up.

Rear stabilizer jacks are standard equipment.

New rear-mounted lift system.

New shock absorbing suspension system.

Standard galvanized wheel wells and open perimeter frame.

Our new door gives you the convenience of two-part construction with all the advantages of a one-piece assembly. The top part is self-storing and swings down easily into position. It features sliding privacy panels that work as a screen door or a storm door. It latches firmly to the bottom door panel for a tight, positive closure. The sidewalls attach with Velcro for a bug-proof, weather-proof seal.

All our StarLites have a complete metal underfloor for maximum protection against road damage and moisture.

There's ample sit-up headroom in the bunk ends.

Cabinetry hardware is all top quality—just like the hardware found on fine furniture.

All StarLites have a 12V/110V power converter and electrical outlets as standard equipment.

All StarLites feature sturdy 3-layer wall construction and our convenient one-piece dolly jack and wheel. They also have rich, luxurious cushion fabrics — Standards you don't expect in a budget-priced camper.

Full-Size, Fully-Featured Campers That Are Light

20 StarLite SD

This StarLite has a unique floor plan the family cook will love. The galley is separate from the dining and social area, yet within easy access for serving. The dinette seats five comfortably at mealtime, and converts to an extra long 78" bed at night. There's plenty of storage for all your camping gear and built-in features everywhere you look.

This full-size StarLite is sure to appeal to families with an eye for versatility and value.

Axle Weight 1140 • Hitch Weight 82
Total Dry Weight 1222

In Weight And Light On Your Wallet.

20 StarLite

Even when fully loaded with all your camping gear, our biggest, roomiest StarLite is still towable by most compact cars. It's equipped with all the standard features found throughout Starcraft's StarLite series, and has an optional bunk (87" long!) that expands its sleeping capacity to eight.

You'll find lots of drawers and cupboards inside to help you organize your campsite accessories and two large storage compartments under the dinette seats that come complete with hinged lids.

If your family needs lots of room and your budget needs a break, the 20 StarLite is just right for you.

Axle Weight 1076 • Hitch Weight 90
Total Dry Weight 1166

17' StarLite. It Only Looks Expensive.

17 StarLite

Inside and outside, the 17 StarLite looks like a premium priced camper. Standard interior features include a 3-burner chrome range, decorator drapes, easy clean vinyl flooring, and real wood cabinets that look like fine furniture.

On the outside, the 17 StarLite has our open perimeter frame design for easy wheel access, built-in stabilizer jacks, and a wide track axle for sure, smooth trailering.

The 17 StarLite is a well equipped camper that's ideal for most any camping family. Don't let its good looks fool you though ... it's really a sensible, economical camper. Check all its standard features on the chart inside the back cover. You won't believe what you get for the price!

Axle Weight 894 • Hitch Weight 86

Total Dry Weight 980

Features And Quality For Value—Minded Families.

16 StarLite

For Camping families on a budget, our 16 StarLite offers incredible value. Tangible value like an internal lifter system so reliable we offer a 5-year limited warranty. A rugged, heavy gauge "C" channel steel frame that's been thoroughly tested for performance and durability. Decorator drapes, power converter, roof vent, 3 burner range, patio light and comfortable sleeping for a family of five.

Compare its features when you compare its price. You won't find a better buy.

Axle Weight 798 ● Hitch Weight 86
Total Dry Weight 884

This StarLite Has Unbelievable Features.

14 StarLite

Our lightest lightweight weighs only 832 lbs. Yet it's equipped with more standards than some so-called "deluxe" brands offer, like a complete electrical system with 110 V outlets and power converter. Like a 3-burner chrome range, roof vent, patio light, bumper, drapes and sectionalized canvas. And, of course, our crank-up lifter system. There's actually much more—see our standard features chart inside the back cover.

STANDARD FEATURES

- Large 12" & 13" Goodyear tires
- Mag style 5 bolt steel wheels w/chrome cap
- Duraflex torsion bar independent suspension
- Super wide track design
- Open wheel frame design
- Galvanized steel wheel wells
- 4" C-Channel heavy gauge steel frame
- Split-style integral steel bumper
- 4 bolt-on, adjustable stabilizer jacks
- 5 layer laminated floor—full insulation
- One piece aluminum underfloor
- One piece vinyl flooring
- Spare tire mounting
- Low effort crank-up roof litters
- 3-year limited litter system warranty
- 4-ply laminated sidewalls
- Solid block foam wall insulation
- Anodized aluminum extrusions
- Large, locking outside storage trunk
- Exclusive, Self-storing 1-piece dolly wheel w/rubber tire
- Full 2" ball coupler
- Safety chains
- Back up lights/license plate light
- 8-way car/camper electrical connector
- 20 lb. LP gas bottle w/hose & regulator
- Bed pole storage
- Laminated, insulated fiberglass end bunks
- 1-piece easy glide bed system
- Real wood interior paneling
- Hinged, plywood seat box storage
- Seamless vinyl end bunk roof
- Auto-raise end bunk roof
- 2-way end bunk windows
- 5 piece sectionalized style tent
- Terrazol 302, 11 to 1 army duck canvas
- Fire retardant canvas
- 3-way tinted vinyl windows
- Fine mesh fiberglass screen
- Foam-backed decorator drapes w/tie backs
- 25' 110V AC power cord
- 110V AC duplex outlets
- 110V AC/12V DC 6-amp power converter
- 2 high intensity ceiling lights
- Amber patio light w/remote switch
- Chrome 3-burner, indoor/outdoor integral range
- Stainless steel sink w/cover
- Brass city water hook-up
- 10 gallon water tank
- Patented swing up galley unit
- 2-stage water faucet
- Real wood cabinetry, screwed in
- Wicker cabinet doors
- Built-in ice box
- Butcher block, high pressure laminate counters
- Light weight indoor/outdoor table
- 1" aluminum screen door
- Self-storing, flip up screen door
- Extra large screen area w/privacy panel
- Rugged metal framed lower door
- Full size chrome door knob
- Slide out storage drawers
- Fire extinguisher
- Heavy aluminum drapery tracks
- Crank-up roof vent
- Door opens w/o lifting roof
- 3-ply laminated roof
- Easy loading wardrobe (except Starflyer & LoneStar)
- Chemical toilet storage
- Super deluxe door hardware
- Aerodynamic radius roof style
- Metal clad laminated roof sideboards
- Mill-rolled lock seamed roof
- High density block foam roof insulation
- Luau paneled ceiling

SHOWER OPTION

Shower option is available on the 24' Galaxy and 24' Stardust

- Heavy-duty water pump
- Fiberglass cap
- 6-gallon quick-recovery water heater
- Privacy/dressing room curtain
- Hand-held shower head
- Hinged countertop lid
- Wrap-around shower curtain
- Hot/cold mixing faucet
- Molded tub base
- 20-gallon water tank

HOT WATER PACKAGE

Hot Water Package is standard on 24 LoneStar and 24 Constellation and optional on 24 Galaxy and 24 Stardust

- Heavy-duty water pump
- Hot/cold mixing faucet
- 6-gallon quick-recovery water heater
