

The 1990 Starcraft Camping Trailers.

Building Memories!

STARCRAFT

Quality and Integrity Since 1903

At Starcraft, we build the campers

Starlite Series

“You asked the boys to wake him but you had no idea they would be so creative!”

It was the second day of vacation. It was nice to see everyone unwind. After all, everyone worked hard for this time off together. You found the perfect campsite nestled in the cool shade of sweet smelling pines. There was no one else around. In the morning, you took the kids out exploring the scenic trails that meandered through the park. Little Jenny just about wore her dad out with all the questions about the beauty that surrounded her. It was a very special moment when Jenny saw her first deer. The boys played scout and just couldn't wait to go swimming in the lake. When dad returned to camp that day you saw the sleepy look in his eyes. The kids wore him out. When he set up the hammock, you knew it was his turn to relax. Not even the smells of lunch cooking could wake him. When lunch was ready, you asked the boys to wake him but you had no idea they would be so creative! You had never seen them all laugh quite that hard.

so you can build the memories!

Starcraft lifter systems are smooth running and safe with an automatic brake. Cranking becomes child's play!

13-inch wheels, on larger models, give you lots and lots of cargo capacity!

The carry-out stove is standard on all models. The stove hooks up to the LP source indoors or outdoors.

With brand new floor plans, beautifully appointed new interiors, exciting exterior graphics and bright new colors, the 1990 Starcraft camping trailers are the best ever! At Starcraft, building quality products that keep our customers satisfied has been a tradition since 1903. You'll camp easier knowing that the solid comfort and security of your Starcraft camper waits for you at the end of the day. There's a camper right for your family's budget in the Starcraft Starlite Series.

All Starcraft campers are built with uncompromising quality. Lifter systems are engineered with solid stainless steel posts and 1/8-inch stainless steel aircraft cable for a lifetime of smooth, rust-free operation. Other time-tested Starcraft standards include: radius roofs for improved runoff, reversible cushions, real wood cabinets, laminated sidewalls, torsion bar suspension systems; and carry-out stoves that allow you the convenience of cooking inside or outside.

New Starlite Series features for 1990 include: a bright new exterior look, new fabrics and color schemes inside, a more spacious bunk on the Starflyer and 13-inch wheels on four models. The Meteor is compact yet loaded with features and economy; perfect for the small family and the small car! If you're looking for quality and economy in the same package, then there's a Starcraft Starlite camper for your family.

A new, larger 75" x 73" bunkend on the Starflyer provides plenty of sleeping room! It's also standard on Starmaster, Starliner and Starstream.

The base camp with a "basement"

“You could see the excitement in her eyes as you went over the highlights of the trail ahead.”

It was your first vacation together and her first trip to the mountains. You'd only been married for a year. You could see the excitement in her eyes as you went over the highlights of the trail ahead. You're sharing good times in the limitless expanse of the big country. These are memories that last a lifetime.

With Starcraft's award winning Spacestar and Starliner "basement" style campers, the days of leaving essential equipment behind are over! By adding just a few inches in height, the Spacestar and Starliner take advantage of space within the dimensions of the frame to provide lots of extra of storage under the floor.

Access to the basement storage is easily gained through four lockable outside doors and two inside. Both models have cargo capacity of 750 lbs. and Starliner has more room with additional storage space and a hutch. You can carry anything from lawn chairs to non-perishable foods. Starcraft's Spacestar and Starliner are perfect for backpackers, fishermen, hunters, scuba enthusiasts or anyone tired of leaving a favorite item behind.

Superior Construction.

Starcraft fold-downs are built with quality to last a lifetime.

(A) Lifter systems are built with heavy-gauge stainless steel posts and 1/8-inch stainless steel cable for years of reliability.

(B) Galvanized steel wheel wells resist corrosion and prevent

damage from road debris.

(C) Independent torsion bar suspension and a wide track axle design combine for superb towing.

(D) The solid steel "C" channel frame is precision engineered for superior strength yet

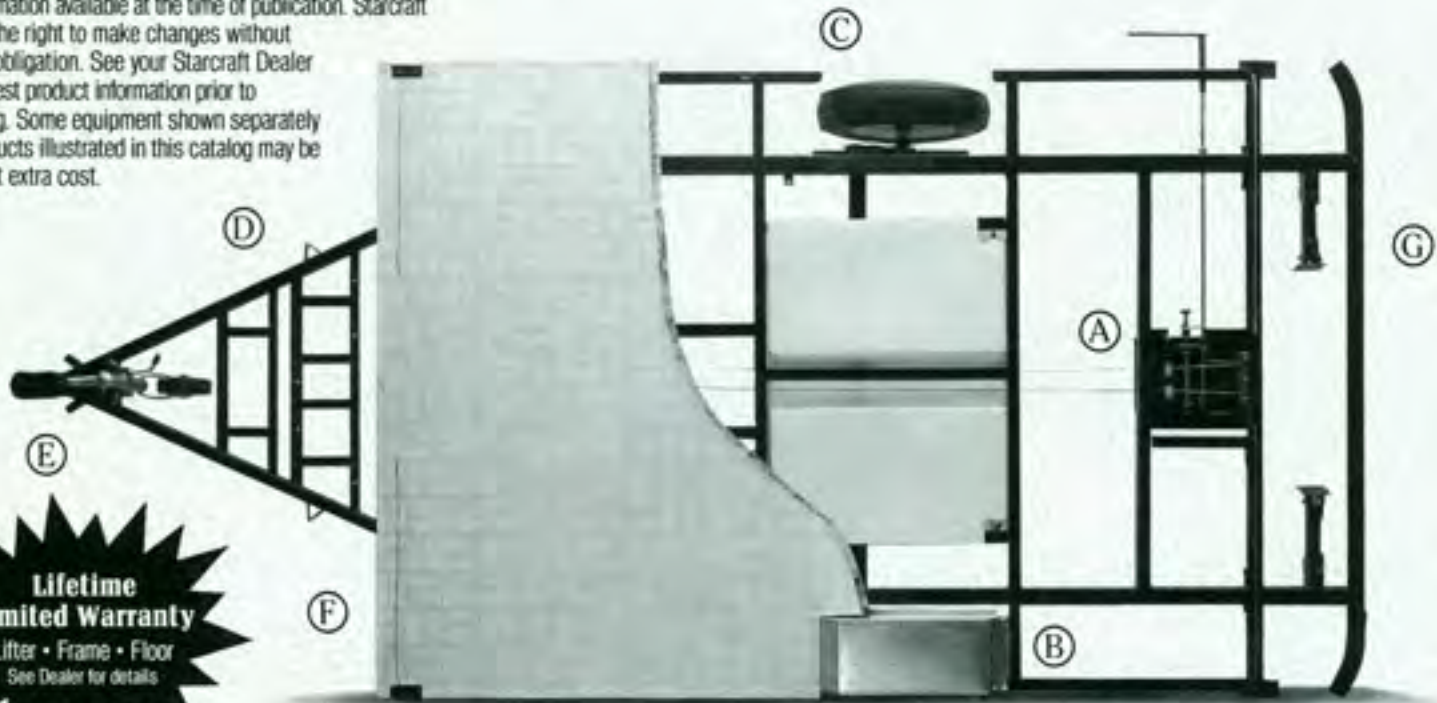

less weight.

(E) The self-storing, retractable dolly jack is easy to use and center mounted for better control.

(F) One-piece Armstrong linoleum covers the entire floor.

(G) The solid steel bumper is fully integrated into the frame.

All product illustrations and data in this catalog are based upon information available at the time of publication. Starcraft reserves the right to make changes without notice or obligation. See your Starcraft Dealer for the latest product information prior to purchasing. Some equipment shown separately or on products illustrated in this catalog may be optional at extra cost.

Starcraft's Bill Garvey, Sr. V.P. of Towable RV Products, and Pete Suhovy, Director of Sales & Marketing, help to illustrate the incredible strength of the Starcraft lifter system.

Quality Standard Features.

(A)

(B)

(C)

(D)

(E)

(F)

(G)

(H)

(I)

(A) Reversible cushions—All cushions have durable fabric on one side and heavy vinyl on the other.

(B) Sectionalized tent—double stitched 10/10 heavy duck canvas zips out into five sections for ease of replacement.

(C) Real wood cabinetry—solid, durable and attractive.

Your Starcraft Dealer:

(D) Seat back supports—hinged plywood supports the cushion.

(E) Outside electrical receptacle—for convenience; a ground fault interrupter for safety.

(F) Plywood bunkends—for solid comfort and durability.

(G) Galvanized steel wheel wells—resist corrosion and prevent road damage.

(H) Stainless steel sink—for easy clean-up.

(I) Carry-out table—makes eating outside a breeze!

You'll be surprised a tent camper

“Grandpa had that gleam in his eye and grandma baked her famous cake!”

The kids were excited when grandma and grandpa arrived. You knew the folks took vacation the same time you did, but you never expected them to show up at the same campsite. Grandpa had that gleam in his eye and grandma baked her famous cake. They got the campsite right next door! It was great to be together as a family again.

You'll be surprised at how much luxury a tent camper can have when you experience the 1990 Starcraft Allstar Series. The Allstars have the same top-notch construction as all Starcraft tent campers with quality features and options that put them in a class all their own. Basic features include: laminated fiberglass sidewalls, outside electrical receptacle, ground fault interrupter, aerodynamic impact resistant Rovel endwalls, wrap-around recessed taillights, backup lights and a third, high-mounted brake light.

can have this much luxury!

Starcraft campers have plenty of headroom with up to 6'7½" or 6'5½" depending on the camper you choose. The flame-retardant, five-piece sectionalized tents have large screens for maximum ventilation. The two-way windows in the bunkends have screens and zip-up canvas for extra privacy. Other windows provide screens along with tinted plastic windows for cool protection from the sun and added privacy.

The Allstar Series has larger water storage capacity. The unique 18-gallon water tank is under the floor between the wheels and over the axle. This allows more storage space inside, better tracking and safer towing. This kind of lateral weight distribution of the water tanks results in virtually no increase in hitch weight. Improved weight distribution means less wear and tear on your tow vehicle and safer handling.

Starcraft's superior engineering and attention to detail assure you years of trouble-free camping. On the Allstar Series, the standard battery rack and wiring is located on the outside under the front cover for easy access and increased interior storage space. Seat back supports are hinged for ease of setup and cut to the size of the cushion for better support.

Starcraft camping trailers are built better to last longer. After all, Starcraft made its dramatic entrance into the camping trailer market by manufacturing the first crank-up camper with a hard top. Buy the best, buy Starcraft.

A refreshing shower is a standard feature on the Constellation and the Starlite Starmaster.

Hot water is a "standard" feature on Allstar Series campers and the Starlite Starmaster.

Factory Retail Option Incentive

Every AllStar at each dealer has these options included free: Hot water system, exterior appearance package and large locking outside storage trunk door.

Options for everyone!
