

Starcraft
1972. You get a lot
more than
a place to sleep.

Starcraft. You get a lot more than a place to sleep.

We know camping trailers have to tow easy, too. So we build leaf-spring suspension into every Starcraft. It allows each wheel to absorb bumps independently and makes sure you get a smooth ride up front. Hydraulic surge brakes are standard on some models.

And a gas heater will keep you warm on the coldest nights.

You also get a high capacity water tank and an outlet to hook up to city water. (Not available on Starlite)

Roof vents for better air circulation on the Starmaster, Stardust, Galaxy and Executive models.

And self-storing dining tables give you all the eating room you need.

Professionally-styled interiors make your Starcraft as beautiful as it is functional. Reversible cushions with a fabric print on one side and a solid color on the other give you more variety looking in.

Built-in stabilizing jacks that allow you to park on almost any terrain are standard.

We know campers have to be functional, too. So we build in all the necessities and a few luxuries.

The kitchens are built up so you don't have to stoop down. The counter tops and sinks are 35" high. (They swing up in most models, built-in permanently in the Galaxy and Executive models.)

There's an ice box you can get to even when the camper's closed. (A gas-electric refrigerator is optional.)

You can sleep in any camping trailer. But you can live in a Starcraft. Because we know what makes camping trailers liveable. That's why we sell more of them than anyone else.

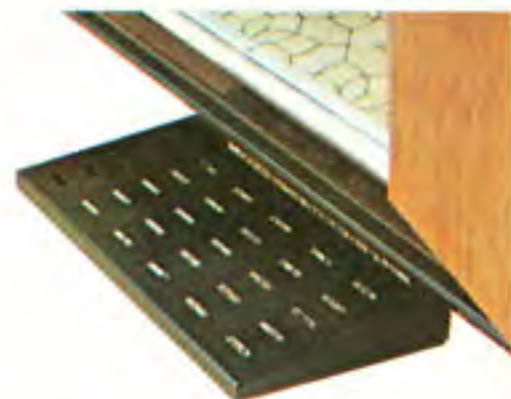

We know they have to be well-constructed. So we build ours solid. A thick 4" steel frame, four-ply sandwich walls, tough canvas, aluminum exteriors and insulated roofs are standard on all Starcraft camping trailers.

The linoleum covered floors are all wood-life treated underneath. So they won't warp or deteriorate. And a steel rear bumper protects the main body of the camper from costly damage. The telescopic lifter system is so unique and so good we had it patented. You won't find a faster or easier camping trailer to set up.

There are three-way windows to give you more variety looking out. And drapes that add a colorful fourth dimension to your three-way windows are standard on some models.

Best of all, the lighting system runs off your car battery as effectively as with campground electricity.

We also give you a lot of different options. Like a door step. A boat rack. A spare wheel and tire. Privacy curtains. And a vinyl door flap.

We know you want to take a few belongings along, so we give you the largest storage capacity of any camping trailer. There are cabinets and drawers for kitchen utensils, pots and pans, clothes and whatever else you can think of. You get a swing-up wardrobe on most Starcrafts.

Side trunk on the Galaxy and Executive models.

Last, but not least, we give you a great place to sleep. Large beds that accommodate four to eight people. Comfortably. And, as an option, an extra room, a canopy or screen enclosure, snaps onto your Starcraft. So even when you get a place to sleep, you get more of a place to sleep.

And a place to store bunk supports and fishing poles.

We build the best electrical system into our camping trailers, too.

Two outside 110V outlets, two inside 110V outlets and an overhead light come standard on every Starcraft.

As does a convenient 110V self-storing power cord.

We make all types of campers for all types of campers.

With Starcraft you get 10 different camping trailers to choose from.
Different lengths.
Different sleeping accommodations.
Different features.
And different standard equipment.
But you get one thing that's the same in all ten.
Quality.

Starlite 6

The Recreational Vehicle Institute has established standards for the plumbing, electricity and L.P. gas systems for camping trailers. For your safety all 1972 Starcraft Camping Trailers will meet or exceed those standards. This is exemplified by the R.V.I. seal our units carry.

Because of constant product improvement throughout the model year, Starcraft reserves the right to change specifications without notice.

And after you buy a Starcraft you're not forgotten.

Two ways. One, we give you a great social club to join. The Starcraft Camper Club. And two, we give you great dealers and service representatives who won't forget your name if something happens to go wrong with your camping trailer. First, the club. There are over 12,000 members in the Starcraft Camper Club.

They get together twice each year for national rallies. And dozens of other times for local rallies. You'll enjoy the fun, the games, and the good comradeship of campers everywhere. The other way you won't feel left out is when you need a part or service for your camping trailer. Because we've got over a thousand authorized dealers and repair services across the country.

So when you buy a Starcraft in Pennsylvania
you can have it serviced in California.

**Starcraft. You get
a lot more than a
place to sleep.**
