

REAR RECEIVER RELEASE FORM

To Whom It May Concern:

I, _____, have requested that Roberts Sales install a hitch-receiver tube on my camping trailer. I understand that this receiver tube is intended to hold a bike carrier; it is *not* to be used for towing a second trailer in tandem or for a storage platform.

I understand that under certain weight, road, speed, or other conditions the possibility exists of over-loading the rear receiver and that damage to my camping trailer may result. I also understand that any weight applied to the rear receiver will decrease the weight of the trailer tongue which may result in unstable towing conditions.

I agree that bicycles and bike carrier weights vary and that a bike carrier can be accidentally overloaded and that no set weight is specifically "light enough" to protect against all negative outcomes to the bikes, bike carrier, rear receiver, and the trailer. I understand conditions such as road type, road condition, and vehicle speed down said road will affect the physics as work on the bike carrier and rear receiver.

I understand that the rear receiver is fully my responsibility regardless of how I use the rear receiver and what weight, road, speed, or any other conditions are present at any time.

By signing this I assume ALL responsibility for the loading and use of the rear receiver and will not hold Roberts Sales liable for any damage, loss, inconvenience, adverse side-effects, headaches, nausea, or ANYTHING resulting from the installation of the rear receiver to my camper.

I also assert that I am a responsible person and, as such, will not use litigation or arbitration to wiggle around this release form.
